**TG EXCLUSIVE**

## NICE TOUCH

Subscription-free GPS you just have to touch!

GolfBuddy's new GolfBuddy World Platinum comes pre-loaded with a whopping 27,500 courses - with no need to add a subscription to the cost. It also features a brilliant touch screen which allows the golfer to pinpoint an exact point on the hole so they can get an instant reading between two points.

The World Platinum model also features a Pro Play system which allows golfers to track and analyse their own game. The Dynamic Green Approach gives the golfer distances to the front, middle and back of the green from any angle of approach as well as showing the actual shape of the green, while the "Touch 'n' Move" flag feature lets you move the pin to anywhere on the green so you can gauge exactly how much room you have to play with.

£349 may seem like a fair bit of cash for The World Platinum, but we feel it's pretty good value for the quality. Oh, and if 27,500 pre-loaded courses aren't enough, the device has enough memory to hold 40,000 tracks! **INFORMATION:** The GolfBuddy World Platinum is available in July, and for more details please visit [www.gpsgolfbuddy.eu](http://www.gpsgolfbuddy.eu)

### Distance assistance

Multi-angle yardages on tap.

### Information overload

27,500 courses pre-loaded.
